About the National Seminar

Students' engagement in the process of higher education management is one of the most important parts of the Institute Process. In order to improve quality, students should participate in and influence the organization and content of education at universities and at higher education institutions. Decisions at every level of an institution impact on the students' learning experience, be it module/unit level, program, department, faculty or institution wide policy and strategy. Many Institutions reported that involving students at all levels provided a different perspective and ensured students were engaged more closely to inform how learning experiences could be better aligned to student learning needs.

Main objective of this Seminar is to make aware faculty on engaging students and quality assurance in Higher Education.

Objectives of the National Seminar

- to present insights about importance of student engagement to ensure quality assurance in higher education,
- to identify the most common ways students are currently engaged in quality assurance processes, so that it may be possible to evaluate the sufficiency and efficacy of these modes of engagement.
- to discuss the challenges or barriers institutions report experiencing in engaging students more meaningfully.
- to identify and compare student engagement practices across institutions along with best practices in quality assurance
- to generate ideas and share a set of recommendations for advancing meaningful student engagement back to the Higher Educational development and quality assurance communities.
